ESP604 Tone Inventory

November 6, 2003

The following signalling tones are implemented in the ESP604 radio.

| Event Signalled | Tone Sound | DSP Tone Number |
|------------------------|----------------|-----------------|
| Synthesizer Unlock | Bee-boop | 2 |
| Unsuccessful handshake | Euro siren | 3 |
| TX Timeout | Rapid beep | 4 |
| Courtesy Tone | Beep | 5 |
| Ringback Tone | Telephone ring | 6 |
| ALC Error Tone | Boo-beep | 7 |
| Invalid Mode | Beep-beep | 10 (0x0a) |

These tones may be sampled, if desired, by using the internal test facilities of the ESP604. Using a dumb terminal or dumb terminal program running on a PC, write the DSP Tone Number to the RAM location \$00ce. The selected tone will play for ½ second. For example, to play the Invalid Mode Tone, enter the following:

pm0100ce0a.
